

Download and Installation

Download site: <http://discovery.acadiau.ca/radR>

radR is installed in its own folder, rather than as an R package.

The latest stable version is date-stamped for convenience.

- **Windows XP / Vista / 7:** the latest version stable version is found [here](#). You will need R version [2.5.1](#). The R-2.5.1 executable installer is also [here](#).
- **Linux:** the source code for the latest stable version is [here](#). You will need R version [2.5.1](#)

Previous source and windows binary versions are available [here](#).

Detailed instructions

First time installation: [Windows XP / Vista / 7](#) | [Linux](#)

...if you have never installed radR before, or wish to create a new installation that will *not* use any saved parameter values or preferences from a previous installation.

Upgrade installation: [Windows XP / Vista / 7](#) | [Linux](#)

... if you wish to upgrade an existing installation of radR. Parameter values and preferences you saved with the existing version [will be preserved](#) in the new installation.
