

Sample Data

This page has sample movie files that you can view without installing radR and some data files which you can download and use with radR.

Visit the [GIFmovie plugin page](#) for several examples of GIFmovies, go to the [GIFmovie: sample radR session subsection](#) for a look a basic look at radR in action, or click on the .WMV file below for examples of radar data that you can view without installing radR. The .WMV movie requires a movie player, such as Windows Media Player.

Included in the movie are data that show normal migration, strong migration, insects, rain and birds, and flocks: [blips.wmv \(15 Mbytes\)](#)

Instructions for viewing data in radR:

- download the .ZIP file
- unzip all three or four files from each .ZIP file into a folder
- inside radR:
 - load the blipmoviearch plugin (these movies use an old version of the blipmovie format)
 - press the **From:** button in the *player* window
 - choose **Blipmovie archive reader -> Choose a file...**
 - browse to the location where you unzipped the .ZIP file
 - hit the **Play** (right pointing triangle in the *player* window) to watch the movie, or drag the slider bar

The Movies (old blipmoviearch format)

- Shag Harbour -- birds taking off at sunset on 10 Sept (short) [SHtakeoff.zip \(2.5 Mbytes\)](#)
- Shag Harbour -- night 10-11 September 2006 (good migration; large files zipped) [SH_060910_bmovie.zip \(66 Mbytes\)](#)
- Roof of building at Acadia University -- afternoon 06 March 2006 (30 minutes; various birds circling; includes sample scores) [roof20070306.zip \(316 Kbytes\)](#)
- Flocks of Robins and Waxwings flying away from the coast
- [FL_060920_flocks.zip \(8.2 Mbytes\)](#)
